GAME OVER FOR THE VACCINE FANATICS - They couldn't hide the dead bodies forever

In the UK their Office of National Statistics have just released an updated data set *Death by Vaccination Status, England* with data for 2023 until the May.

ons.gov.uk/releases/death...

Notably, the Australian Bureau of Statistics has similar data, but they refuse to publish it. I wonder why ?

This just published data shows that from Jan to May 2023 there were 8,766 Covid deaths in England

8,330 deaths **(95.03%)** were people vaccinated
436 deaths **(4.97%)** were people unvaccinated

That's it. The last card the vaccine pushers had to play, the claim that the jabs prevented covid deaths has fallen.

But its worse.

The just released data also shows that the vaccinated are overrepresented in all cause deaths.

The UK data is the best in world, and with this latest data release all remaining mandates must end and the vaccine must be pulled off the market today.

To allow another person to be injected after today when this data has been published would be criminally negligent.

Any you'd expect this story to be on the front pages of papers today. But astonishingly again the media is silent.

The media are either bought off as paid shills of Big Pharma, incapable of understanding the data, or too cowardly to publish the facts. What has happen to journalism ?
